Empowering students today to create the world of tomorrow

We believe technology can inspire creativity in today's classrooms, where the makers of tomorrow reside. This next generation of creators embrace technology as their first language; learn by collaborating and communicating with anyone in the world; and create with touch, command with voice, and conceptualize in 3D.

Microsoft introduces a set of educational products and services that's affordable and easy-to-manage — inspired by teachers and students and streamlined for performance and simplicity.

HUB Tech is your trusted advisor and we are here to Listen, Understand, and Recommend the best options for your school district.

Stick with Security: Put procedures in place to keep your security current and address vulnerabilities that may arise

*used with permission from FTC.gov
by Thomas B. Pahl, Acting Director, FTC Bureau of Consumer Protection.*

"Sound data security is a process, not a checklist." We've all heard that slogan – and with good reason. The way that sensitive information moves into, through, and out of your company's networks or the software products you develop is ever-evolving. So, too, are the risks that hackers and data thieves pose as they adapt to the countermeasures you take to foil their efforts. Approaching data security with a one-and-done attitude ignores the here-and-now realities you face.

How hospitals are keeping patient data secure

used with permission from HP Technology at Work

Given the wealth of sensitive personal data healthcare organizations process and store, it's no surprise that hospitals, medical offices, and other healthcare systems are prime targets for cybercrime. In 2014, an estimated 85 percent of large healthcare organizations faced a data breach, and one in five of those breaches cost the organization more than \$1 million to rectify.¹

Due to the costs a data breach can inflict on the operation, as well as the patients it's entrusted to care for, healthcare organizations have become more vigilant and determined to battle cybercrime—and their efforts underscore important steps any business can apply to improve data security.

Office 365 is your complete office in the cloud

Office 365 is your complete office in the cloud and is a great choice for businesses of all sizes, especially since 43% of SMB employees work at more than one location. Whether it be from your car, home, or office, you can access your documents that are stored in the cloud from anywhere. Every user can install Office on up to 5 PCs or Macs so you have access anytime, from PC to smartphone and tablet.

Monthly Quote

"Next time someone complains that you have made a mistake, tell him that may be a good thing. Because without imperfection, neither you nor I would exist."

-- **Stephen Hawking**

Business Continuity Tip

Using LinkedIn Safely and Securely

LinkedIn is the social network for the business world — whether you're a professional highlighting your skills and work history, or a company networking with other businesses or advertising open positions. Like any social network, there are security concerns you should look out for on LinkedIn's platform.
