Office 365: A More Cost-Effective Option for Business

used with permission from HTS

Office 365 is a cloud-based productivity suite that offers a wide range of tools and services. It includes applications like Word, Excel, PowerPoint, Outlook, and OneDrive, all accessible from any device with an internet connection. This flexibility allows businesses to work remotely and collaborate more effectively. Additionally, Office 365 offers automatic updates, ensuring users always have the latest features and security patches. The subscription model also provides predictable costs and includes support, making it a cost-effective choice for businesses of all sizes.

Stick with Security: Secure paper, physical media, and devices

used with permission from FTC.gov
by Thomas B. Pahl, Acting Director, FTC Bureau of Consumer Protection

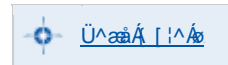

Physical security is a critical component of any security strategy. This includes securing paper documents, physical media like USB drives, and the devices themselves. Employees should be trained on proper handling and disposal of sensitive information. Physical access controls, such as locks and security cameras, are also essential for protecting physical assets.

Cryptojacking: What it is and how to prevent it

used with the permission of <http://thenetwork.cisco.com>
by Stephanie Chan

Cryptojacking is a form of malware that hijacks a victim's computer resources to mine cryptocurrencies like Bitcoin. This can lead to significant system slowdowns and increased electricity costs. Prevention involves keeping software updated, using reputable security solutions, and being cautious of suspicious emails or downloads.

What HUB Tech Clients Are Saying

"The collaboration and communication we have with HUB Tech is extremely important to our school district."

- Network Manager, Holliston Public Schools

Just for Laughs...

© MARK ANDERSON, WWW.ANDERSTOONS.COM

"This. Changes. Everything."

Monthly Quote

"If you don't know anything about computers, just remember that they are machines that do exactly what you tell them but often surprise you in the result." -- **Richard Dawkins**

Business Continuity Tip

Be Wary of Insider Threats to Your Security

Not all security threats come from outside: human beings in organizations are often threats as well, from accidents to negligence to malicious behavior. Be wary of the inside threats as well when considering your overall security posture.
