

# Hewlett Packard Enterprise

**HPE StoreOnce** - Simple, affordable and flexible backup protection with rapid recovery and application-integration. From ROBO to the entire enterprise, HPE StoreOnce with HPE StoreOnce Catalyst is a single, agile, efficient and secure backup and recovery solution. Reduce costs and keep pace with rapid data growth, confident that your SLAs are securely met and your valuable data is not at risk.

**HPE StoreOnce VSA** provides low cost data protection for virtualized environments and is fully compatible with all other StoreOnce products enabling you to replicate your data in deduplicated form for disaster recovery purposes.

**HPE StoreOnce** with HPE StoreOnce Catalyst is the only federated deduplication solution providing disk-based backup for IT environments, from the smallest remote sites to the largest enterprises.

## Flexibility of software

## Power of hardware

### HPE StoreOnce VSA

- Hardware and Hypervisor agnostic
- Provides scalable capacity up to 4TB, 10TB or 50TB
- Protocol support: StoreOnce Catalyst, CIFS, NFS, iSCSI VTL
- Centralized deployment for large volume of remote offices
- Replication compatible with StoreOnce hardware appliances
- Security: StoreOnce Integrity Plus and StoreOnce Security Pack
- [Free 1TB StoreOnce VSA](#)

### HPE StoreOnce

- 3000 Series - Catalyst, iSCSI VTL, CIFS / NFS
- 4000 Series - Catalyst, iSCSI / FC VTL, CIFS / NFS
- 5000 Series - Catalyst, iSCSI / FC VTL, CIFS / NFS
- Hardware-based RAID 5 or RAID 6<sup>1</sup>
- Usable capacity: from 5.5TB usable to 432TB usable<sup>1</sup>
- Logical Capacity with deduplication from 110TB to 34PB<sup>2</sup>
- Security: StoreOnce Integrity Plus and StoreOnce Security Pack

<sup>1</sup> Based on model

<sup>2</sup> Assumes 20:1 deduplication ratio

## Where to sell

### Target applications:

- Improving backup efficiency and shortening backup and recovery times
- Improving availability
- Integrating deduplication and replication

### HPE StoreOnce is the ideal solution for customers:

- That are looking for affordable balance of cost, capacity and performance for small data center, workgroup or remote and branch offices.
- Require a secure, scalable data protection for their midsize data center and regional offices.
- Want a highly scalable backup architecture that effectively handles issues such as rapid data growth and complexity while meeting ever-increasing SLAs.

## When HPE StoreOnce and StoreOnce VSA fit best...

Single deduplication engine from a small single office to multiple ROBO/DR sites

Deduplicate anywhere - VM, application server, backup server, hardware appliance and backup software

Industry leading ingest and restore performance

Any x86 server or storage platform

Supported on VMware, Hyper-V and KVM

Non-virtualized infrastructure

Fast backup & restore performance
