THE WOLF - TRUE ALPHA RETURNS

Who's Afraid of The Wolf?

The Wolf - True Alpha

Last year we introduced you to **The Wolf**, a powerful video from our partner HP to show you how vulnerable your organization can actually be.

The Wolf is back, and this time he's not alone. Christian Slater returns as The Wolf with Jonathan Banks (from Breaking Bad) as The Fixer in the HP Studio's latest film: **THE WOLF - TRUE ALPHA**.

Again, The Wolf uses under-secured printers and PC's to create havoc in his mission to expose security vulnerabilities that only HP security can solve. Endpoint security will never be the same.

HAVE YOU THOUGHT ABOUT YOUR PRINTER ENVIRONMENT?

Any questions after watching, please contact me and I will be happy to schedule time to speak about our Security Assessment and Cyber Security Awareness Training.

HUB Tech's Managed IT Services

A proactive approach to technology and infrastructure management

You can Focus on your business - we'll worry about your technology
If there's one certainty in IT, it's that things are uncertain. Computers crash, software doesn't work as it should, and problems occur. And when they do, the way that you respond can be the difference between a minor hiccup and a full-blown business interruption.

Our fully-managed IT services suite is designed to provide you with 24/7 peace of mind, freeing you to focus on driving your business forward. We monitor your systems, apply patches, protect against viruses, ensure backups are performing successfully, and more. We'll catch (and fix) the little problems before they become big ones.

Don't Let a Natural Disaster Become a Data Security Calamity

used with permission from FTC Business Center Blog, by Lisa Weintraub Schifferle

A natural disaster can wreak havoc on any business. But it's even worse when that real-world catastrophe becomes a data security calamity.

Before the summer storm season arrives, get your business ready. Just like you gather flashlights, bottled water, and emergency supplies, you can prepare your business by reviewing data retention and disposal practices.

How to avoid a Bitcoin blackmail scam

used with permission from [FTC.gov](https://www.ftc.gov) by Cristina Miranda

I know about the secret you are keeping from your wife and everyone else. You can ignore this letter, or pay me a \$8600 confidentiality fee in Bitcoin”.

It's enough to send shivers down anyone's spine, but these chilling words are part of a new scam targeting men.

Here's how it works.

"This is a new stress test; we just put on the news."

Monthly Quote

"To succeed in life, you need three things: a wishbone, a backbone and a funny bone." -- **Reba McEntire**

Business Continuity Tip

Business Email Compromise Scams

Business Email Compromise (BEC) scams use social engineering and deception to defraud organizations and steal their employees' information and identities. These types of scams try to trick employees into transferring money or sensitive information to the scammer. Many organizations fall victim during tax season.
